Author Index—Volume 32 (2000)

(The issue number is given in front of page numbers)

Abril-Raymundo, M.R. and B. García-Archilla, Approximation properties of a mapped Chebyshev method (2) 119–136

Aves, M.A., P.J. Davies and D.J. Higham, The effect of quadrature on the dynamics of a discretized nonlinear integro-differential equation (1) 1–20

Avudainayagam, A. and C. Vani, Wavelet–Galerkin method for integro–differential equations (3) 247–254

Belikov, V.V. and A.Yu. Semenov, Non-Sibsonian interpolation on arbitrary system of points in Euclidean space and adaptive isolines generation (4) 371–387

Burrage, K. and T. Tian, Parallel half-block methods for initial value problems (3) 255–271

Carey, G.F., see **Plaza, A.** (2) 195–218

Carey, G.F., see **Plaza, A.** (4) 401–418

Chen, T.C., see **Yang, J.C.** (4) 435–445

Chesneaux, J.-M., see **Montagnac, M.** (1) 103–117

Dallon, J.C., Numerical aspects of discrete and continuum hybrid models in cell biology (2) 137–159

Davies, P.J., see **Aves, M.A.** (1) 1–20

Dick, E., see **Riemslagh, K.** (4) 419–433

Edoh, K.D., R.D. Russell and W. Sun, Computation of invariant tori by orthogonal collocation (3) 273–289

Formaggia, L., see **Manzi, C.** (4) 389–399

García-Archilla, B., see **Abril-Raymundo, M.R.** (2) 119–136

Higham, D.J., see **Aves, M.A.** (1) 1–20

Imoro, B., Discretized obstacle problems with penalties on nested grids (1) 21–34

Ivanenko, S.A. and G.V. Muratova, Adaptive grid shallow water modeling (4) 447–482

Jia, Z., A refined subspace iteration algorithm for large sparse eigenproblems (1) 35–52

Kweon, J.R., Hierarchical basis a posteriori error estimates for compressible Stokes flows (1) 53–68

Lenferink, W., Pointwise convergence of approximations to a convection–diffusion equation on a Shishkin mesh (1) 69–86

Li, S., L. Petzold and W. Zhu, Sensitivity analysis of differential–algebraic equations: A comparison of methods on a special problem (2) 161–174

Li, Z., A periodic relaxation method for computing microstructures (3) 291–303

Liu, B. and D. Tang, A numerical simulation of viscous flows in collapsible tubes with stenoses (1) 87–101

Manzi, C., F. Rapetti and L. Formaggia, Function approximation on triangular grids: some numerical results using adaptive techniques (4) 389–399

Elsevier Science B.V.

Montagnac, M. and J.-M. Chesneaux, Dynamic control of a BICGSTAB algorithm (1) 103–117
Muratova, G.V., see **Ivanenko, S.A.** (4) 447–482

Owens, R.G., see **Valenciano, J.** (3) 305–329

Padrón, M.A., see **Plaza, A.** (4) 401–418
Petzold , L., see **Li, S.** (2) 161–174
Pfabe, K. and T.S. Shores, Numerical methods for an ion transport problem (2) 175–193
Plaza, A. and G.F. Carey, Local refinement of simplicial grids based on the skeleton (2) 195–218
Plaza, A., M.A. Padrón and G.F. Carey, A 3D refinement/derefinement algorithm for solving evolution problems (4) 401–418

Rapetti, F., see **Manzi, C.** (4) 389–399
Rice, J.R., P. Tsompanopoulou and E. Vavalis, Interface relaxation methods for elliptic differential equations (2) 219–245
Riemslagh, K., J. Vierendeels and E. Dick, An arbitrary Lagrangian–Eulerian finite-volume method for the simulation of rotary displacement pump flow (4) 419–433
Russell, R.D., see **Edoh, K.D.** (3) 273–289

Semenov, A.Yu., see **Belikov, V.V.** (4) 371–387
Shores, T.S., see **Pfabe, K.** (2) 175–193
Soni, B.K., Grid generation: Past, present, and future (4) 361–369
Spitaleri, R.M., Full-FAS multigrid grid generation algorithms (4) 483–494
Sun, W., see **Edoh, K.D.** (3) 273–289

Tang, D., see **Liu, B.** (1) 87–101
Tian, T., see **Burrage, K.** (3) 255–271
Tsompanopoulou, P., see **Rice, J.R.** (2) 219–245

Valenciano, J. and R.G. Owens, A new adaptive modification strategy for numerical solutions to elliptic boundary value problems (3) 305–329
Vani, C., see **Avudainayagam, A.** (3) 247–254
Vavalis, E., see **Rice, J.R.** (2) 219–245
Vierendeels, J., see **Riemslagh, K.** (4) 419–433

Waldén, J., Filter bank subdivisions of bounded domains (3) 331–357

Yang, J.C. and T.C. Chen, The structured grid generation using Beta-spline curve/surface modeling (4) 435–445
